SUMMARY

Computer Science undergraduate with 6+ years of programming experience with strong collaborative skills, communication, and project management. Highly adaptable and passionate about game development and graphic design.

EDUCATION

University of California San Diego

Bachelor of Science, Computer Science

Expected September 2026

- GPA: 3.5
- Relevant coursework: Software Engineering, Computer Graphics

Southwestern Community College

Associates, Computer Science

May 2024

- Student of Distinction Award
-

RELEVANT EXPERIENCE

"The Trigamid" - 2D trigonometry learning puzzle game

Sept/2025-Dec/2025

Lead Programmer & Art Designer

- Collaborated within an Agile development team to apply software development practices, participated in sprint workflows, and demonstrated progress by contributing to retrospectives
- Designed concept, game art, UI, in-game inventory system
- Translated Figma mockups into interactive, responsive, in-game UI
- Collaborated with team to track and resolve UI related bugs, troubleshooted and resolved UI-related technical challenges, including performance and quality
- Assisted in creating and refining product concepts to define user needs and functional requirements
- Coordinated with developers and stakeholders through meetings, documentation, and digital communication tools to ensure alignment on project deliverables and timelines
- Presented and demonstrated completed features and product functionality to teammates, stakeholders, and reviewers through a video demonstration

Southwestern College MESA Center, Math and Programming Tutor

Jan/2020-May/2024

- Enhanced student STEM understanding and applying of programming fundamentals through one-on-one and small group instruction
- Collaborated with professors to address common challenges to improve teaching techniques and learning outcomes
- Guided students through ideating and coding individualized projects using Java and C
- Supported students in developing foundational computational thinking and software development skills

Southwestern College, Math 230 Teaching Assistant

Jan/2023-May/2024

- Reviewed and debugged student code to identify errors and improve program functionality and efficiency
 - Maintained detailed session notes and tracked student progress to support continued academic improvement
 - Maintained accurate grading records and managed assignment deadlines in a fast-paced academic environment
-

SKILLS

- **Programming/Libraries:** Python, C/C++, Java, Javascript (Konva), Git
- **Software:** Figma, Adobe (Photoshop, Illustrator), Microsoft 365 (Word, Excel, Powerpoint)
- **Art:** 8-Bit Pixel Art, Graphic Design, Video Editing
- **Highlights:** UI/UX, Illustration, Project Management, Teaching, Customer Service, High-Level Communication
